INDEX METHODOLOGY

For the Index Categories Future Cars and Cyber Security, the selection process of the Index Components follows the process as defined in the index guideline of the Solactive Future Cars Index and the Solactive Global Cyber Security Index, respectively:

<https://www.solactive.com/wp-content/uploads/2017/10/Solactive-Future-Cars-Index.pdf>

<https://www.solactive.com/wp-content/uploads/2017/08/Solactive-Global-Cyber-Security-Index.pdf>

For the remaining Index Categories, the Top 10 companies according to the Security-level Market Capitalization are selected as Index Components. Should there be less than 5 eligible companies in an Index Category, the entire Index Category is not considered further in the index selection process. As at each rebalancing, the Index Components will be based on certain criteria, including the following:

Must be classified under an industry group, industry or sub-industry of the FactSet Revere Business Industry Classification System

+

Must have a minimum market capitalization of at least \$100 million, or in the case of Future Cars, a minimum market capitalization of at least CAD\$500 million

+

A minimum average daily value traded of at least \$2 million based on the preceding one or six months, or in the case of Cyber Security and Future Cars, \$2 million based on the preceding 3 months or \$5 million based on the preceding 3 months, respectively.

* For the period ending November 30, 2020. The indicated rates of return are the historical annual compound total returns net of fees (except for figures of one year or less, which are simple total returns) including changes in per unit value and reinvestment of all dividends or distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. The rates of return shown in the table are not intended to reflect future values of the ETF or returns on investment in the ETF. ETFs are not guaranteed, their values change frequently, and past performance may not be repeated.

** Performance since inception on May 2, 2018.
