HOW RISKY IS IT?

The value of the ETF can go down as well as up. You could lose money. One way to gauge risk is to look at how much an ETF's returns change over time. This is called “volatility”.

In general, ETFs with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

RISK RATING

Evolve ETFs has rated the volatility of this ETF as **medium to high**. This rating is based on how much the ETF’s returns have changed from year to year. It doesn’t tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

Low	Low to Medium	Medium	Medium to High	High
-----	---------------	--------	-----------------------	------

For more information about the risk rating and specific risks that can affect the ETF’s returns, see the “Risk Factors” section of the ETF’s prospectus.

NO GUARANTEES

ETFs do not have any guarantees. You may not get back the amount of money you invest

HOW HAS THE ETF PERFORMED?

This section tells you how Hedged ETF Units of the ETF have performed over the past year. Returns¹ after expenses have been deducted. These expenses reduce the ETF’s returns. This means that the ETFs returns may not match the returns of the Solactive E-Gaming Index.

¹ Returns are calculated using the ETF’s net asset value (NAV)

<p>YEAR-BY-YEAR RETURNS</p>	<p>This section tells you how Hedged ETF Units of the ETF have performed in the past year. The ETF dropped in value in 0 of the 1 year. TRADING ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and NAV.

Market Price

ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can affect the market price.

You can get price quotes any time during the trading day. Quotes have two parts: bid and ask.

The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "bid-ask spread".

In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net Asset Value (NAV)

Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investment at that point in time.

NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

WHO IS THIS ETF FOR?

Investors:

- Seeking capital appreciation through exposure to equity securities of companies involved in hardware, software and services relating to the electronic gaming industry;
- That are willing to accept a medium degree of risk; and
- That do not need a steady source of income from their investment.

A WORD ABOUT TAX

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

HOW MUCH DOES IT COST?

This section shows the fees and expenses you could pay to buy, own and sell Hedged ETF Units of the ETF. Fees and expenses – including trailing commissions – can vary among ETFs. Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. BROKERAGE COMMISSIONS	You may have to pay a commission every time you buy and sell units of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.								
2. ETF EXPENSES	<p>You don't pay these expenses directly. They affect you because they reduce the ETF's returns. As of December 31, 2020, the ETF's expenses were 1.38 % of its value. This equals to \$13.80 for every \$1,000 invested.</p> <table border="1" data-bbox="386 594 1516 863"> <thead> <tr> <th colspan="2" data-bbox="386 594 1516 653">Annual rate (as a % of the ETF's value)</th> </tr> </thead> <tbody> <tr> <td data-bbox="386 659 1344 768">Management Expense Ratio (MER) This is the total of the ETF's management fee, a fixed administration fee and certain other operating expenses. 3. TRAILING COMMISSION	The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide you. This ETF doesn't have a trailing commission.								

OTHER FEES

Fee	What you pay
Other charges	An amount may be charged to offset certain transaction costs associated with an issue, exchange or redemption of the units. This charge does not apply to unitholders who buy and sell their units through the facilities of the Toronto Stock Exchange.

WHAT IF I CHANGE MY MIND?
