BASE seeks to replicate, to the extent reasonably possible and before fees and expenses, the performance of the Solactive Global Materials & Mining Index, or any successor thereto, while mitigating downside risk. The ETF invests directly or indirectly in equity securities of global issuers engaged in the manufacturing, mining and/or integration of metals and materials, while writing covered call options on up to 33% of the portfolio securities, at the direction of the Manager. The level of covered call option writing may vary based on market volatility and other factors.

*For the period ending August 31, 2021. The indicated rates of return are the historical annual compound total returns net of fees (except for figures of one year or less, which are simple total returns) including changes in per unit value and reinvestment of all dividends or distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. The rates of return shown in the table are not intended to reflect future values of the ETF or returns on investment in the ETF. ETFs are not guaranteed, their values change frequently, and past performance may not be repeated.
