## Investment Objective

The Evolve S&P/TSX 60 CleanBeta™ Fund seeks to provide long-term capital growth by replicating, net of fees and expenses, the performance of the S&P/TSX 60 Index while striving to offset the carbon footprint of the constituent securities in the portfolio.

## Who Should Consider this Fund?

### INVESTORS WHO ARE:

- willing to take the risk associated with equity investments; and
- seeking long-term capital growth by replicating the performance of the S&P/TSX 60 Index, while striving to offset the carbon footprint of the constituent securities in the portfolio.

## CleanBeta™ Strategy

1. As part of the Evolve S&P/TSX 60 CleanBeta™ Fund's socially responsible investing strategy, Trucost a division of S&P Global, will determine the carbon footprint by utilizing the Trucost Data Methodology Guide. The Fund may employ a variety of strategies, including screening or purchasing and retiring carbon credits, as a means to neutralize the full carbon footprint of the Fund. Trucost calculates the carbon footprint of the Constituent Issuers of the applicable Index, at least annually.

2. At least initially, Evolve will strive to directly or indirectly purchase and concurrently retire a corresponding amount of carbon credits through registries or directly from offset generators. Evolve will purchase carbon credits that it believes satisfies the verification standards of widely recognized voluntary offset programs including the Gold Standard, the American Carbon Registry, the Climate Action Reserve, Verified Carbon Standard (Verra), the Plan Vivo System, CSA Group Registries or other such programs.

3. Carbon credits paid for by the Fund will not become assets of the Fund, but will be retired immediately upon purchase. As the Fund will bear the full cost required to retire an amount of carbon credits determined by Evolve to be reasonable or necessary to achieve a carbon neutral portfolio, the performance returns of the Fund will necessarily be reduced by the actual costs incurred by the Fund in purchasing and retiring carbon credits. The size of the carbon footprint of the Constituent Issuers in the portfolio (and therefore the amount of carbon credits determined to be purchased by Evolve), as well as the actual prices available to the Fund in purchasing and retiring carbon credits, are expected to vary depending on the actual level of greenhouse gas emissions produced by Constituent Issuers from time to time in the portfolio.
