Evolve Active Canadian Preferred Share Fund

DIVS seeks to provide holders of Units with stable income and long-term capital appreciation by investing primarily in a diversified mix of preferred shares of primarily Canadian issuers, in addition to U.S. and international issuers.

ETF TICKER: DIVS (UNHEDGED)
MUTUAL FUND FUNDSERV CODE: EVF100 (CLASS F); EVF101 (CLASS A)
SUB-ADVISOR: ADDENDA CAPITAL

Active management in Canadian preferred shares continues to be an attractive investment opportunity. Addenda Capital is one of Canada’s largest multi-asset investment firms, with over $33.4 billion in assets under management*, including $217 billion in fixed income and over $829 million in preferred shares.

Source: Addenda Capital, as at June 30, 2023. *Excludes $1.8 billion in Advisory assets and $309 million in Overlay assets.

Market Review

Amid a shortage of corporate news in September, the Federal Reserve took center stage and addressed concerns about inflation. Their commitment to a prolonged period of elevated interest rates caused widespread market declines, erasing expectations of imminent rate cuts.

Bond yields have experienced a rapid ascent over the past two years, and although equities have largely remained resilient thus far, this trend could pose future challenges. Furthermore, as yields continue to climb higher and stay elevated for longer, the likelihood of unexpected market disruptions is increasing.

In September, bond yields also rose, with the 2-year GoC increasing by 32 basis points and the 10-year by 47 basis points. This was influenced by the Federal Reserve’s commitment to a higher-for-longer interest rate stance, dispelling earlier expectations of rate cuts.

The FTSE Canada Universe Index declined -3.87% during the month of September, while the FTSE Corporate Bond Index fared a bit better with a return of -2.22%. The Preferred Shares market was down -1.43%.

Positioning

The preferred share asset class has lacked a catalyst for investors. All-in nominal yields look attractive, but less so when compared to similar risk asset classes. Despite the pref share market being soft as investors look to other asset classes for returns, the Evolve DIVS Preferred Shares strategy generated negative absolute returns during the month of September but outperformed the benchmark. The strategy continues to meaningfully outperform the broader market over the 1-year period, as well as since Addenda’s inception in April 2020.

Perspective

The outlook for the preferred share market will be highly correlated to other risk assets and the movement of credit spreads. There will be an underlying headwind specifically for preferred shares as Institutional preferred shareholders evaluate the Canadian budgetary changes.

Going forward, we expect preferred shares prices to be highly correlated to similar higher risk fixed income assets like, high yield, LRCN’s, NVCC and hybrids. The portfolio is positioned to be defensive by holding a large cash position (-4%), fixed income (-13%) and defensive preferred shares (high-rate resets).

As Central Bankers continue to reduce monetary policy and restrict financial conditions, we expect credit spreads will come under pressure affecting the preferred share market.

Commissions, trailing commissions, management fees and expenses all may be associated with exchange traded mutual funds (ETFs) and mutual funds. Please read the prospectus before investing. ETFs and mutual funds are not guaranteed, their values change frequently, and past performance may not be repeated. There are risks involved with investing in ETFs and mutual funds. Please read the prospectus for a complete description of risks relevant to the ETF and mutual fund. Investors may incur customary brokerage commissions in buying or selling ETF and mutual fund units. This communication is intended for informational purposes only and is not, and should not be construed as, investment and/or tax advice to any individual.

The indicated rates of return are the historical annual compound total returns net of fees (except for figures of one year or less, which are simple total returns) including changes in per unit value and reinvestment of all dividends or distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. The rates of return shown in the table are not intended to reflect future values of the ETF or returns on investment in the ETF. ETFs are not guaranteed, their values change frequently, and past performance may not be repeated.
