### WHAT DOES THE ETF INVEST IN?

The investment objective of the Evolve Fund is to replicate, to the extent reasonably possible before fees and expenses, the performance of the Solactive European Bank Top 20 Equal Weight Index Canadian Dollar Hedged, or any successor thereto, while mitigating downside risk. The ETF invests primarily in the equity constituents of the Solactive European Bank Top 20 Equal Weight Index Canadian Dollar Hedged, or any successor thereto, while writing covered call options on up to 33% of the portfolio securities, at the discretion of the Manager. The level of covered call option writing may vary based on market volatility and other factors.

### HOW RISKY IS IT?

The value of the ETF can go down as well as up. You could lose money. One way to gauge risk is to look at how much an ETF's returns change over time. This is called “volatility”.

In general, ETFs with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

**RISK RATING**

Evolve has rated the volatility of this ETF as **high**. This rating is based on how much the ETF’s returns have changed from year to year. It doesn’t tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

|            |                      |               |                       |             |
|------------|----------------------|---------------|-----------------------|-------------|
| <b>Low</b> | <b>Low to Medium</b> | <b>Medium</b> | <b>Medium to High</b> | <b>High</b> |
|------------|----------------------|---------------|-----------------------|-------------|

For more information about the risk rating and specific risks that can affect the ETF’s returns, see the “Risk Factors” section of the ETF’s prospectus.

**NO GUARANTEES**

ETFs do not have any guarantees. You may not get back the amount of money you invest.

**HOW HAS THE ETF PERFORMED?**

This section tells you how Hedged ETF Units of the ETF have performed over the past 1 year. Returns<sup>1</sup> after expenses have been deducted. These expenses reduce the ETF's returns. This means that the ETFs returns may not match the returns of the Solactive European Bank Top 20 Equal Weight Index Canadian Dollar Hedged.

<sup>1</sup> Returns are calculated using the ETF’s net asset value (NAV)

**Year-by-year returns**

This chart shows how hedged ETF units of the ETF performed in the past 1 year. The ETF dropped in value in 0 of the 1 year.

The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

**Best and worst 3-month returns**

This table shows the best and worst returns for the hedged ETF units of the ETF in a 3-month period over the past 1 year. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

|                     | Return  | 3 Months Ending  | If you invested \$1,000 at the beginning of the period |
|---------------------|---------|------------------|--|
| <b>Best return</b>  | 21.16%  | January 31, 2023 | Your investment would rise to \$1,211.60               |
| <b>Worst return</b> | -10.84% | May 31, 2023     | Your investment would drop to \$891.60                 |

**Average return**

This section shows the value and annual compounded rate of return of a hypothetical \$1,000 investment in hedged ETF units of the ETF.

As at March 31, 2024, a person who invested \$1,000 in the fund since inception now has \$1,291.04. This works out to an annual compounded rate of return of 12.18%.

### TRADING ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

#### Pricing

ETFs have two sets of prices: market price and NAV.

#### Market Price

ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF’s investments can affect the market price.

You can get price quotes any time during the trading day. Quotes have two parts: bid and ask.

The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is call the “bid-ask spread”.

In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

#### Net Asset Value (NAV)

Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF’s investment at that point in time.

NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

#### Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

#### Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

### WHO IS THIS ETF FOR?

Investors:

- seeking capital appreciation through exposure to equity securities of European banks;
- willing to take the risk associated with equity investments; and
- seeking increased yield from a covered call strategy.

### A WORD ABOUT TAX

In general, you’ll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

### HOW MUCH DOES IT COST?

This section shows the fees and expenses you could pay to buy, own and sell Hedged ETF Units of the ETF. Fees and expenses – including trailing commissions – can vary among ETFs. Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

| <b>1. BROKERAGE COMMISSIONS</b>   | You may have to pay a commission every time you buy and sell hedged ETF units of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.   |  |  |   |       |  |       |                     |              |
|---|---|--|--|---|-------|--|-------|---------------------|--------------|
| <b>2. ETF EXPENSES</b>  | You don’t pay these expenses directly. They affect you because they reduce the ETF’s returns. As of December 31, 2023, the ETF’s expenses were 1.54% of its value. This equals to \$15.40 for every \$1,000 invested. <table border="1" data-bbox="438 1585 1521 1837"> <thead> <tr> <th colspan="2" style="text-align: right;">Annual rate<br/>(as a % of the ETF’s value)</th> </tr> </thead> <tbody> <tr> <td> <b>Management Expense Ratio (MER)</b><br/>                     This is the total of the ETF’s management fee, a fixed administration fee and fund costs. The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

**Best and worst 3-month returns**

This table shows the best and worst returns for the unhedged ETF units of the ETF in a 3-month period over the past 1 year. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

|                     | Return  | 3 Months Ending  | If you invested \$1,000 at the beginning of the period |
|---------------------|---------|------------------|--|
| <b>Best return</b>  | 27.56%  | January 31, 2023 | Your investment would rise to \$1,275.57               |
| <b>Worst return</b> | -11.29% | May 31, 2023     | Your investment would drop to \$887.05                 |

**Average return**

This section shows the value and annual compounded rate of return of a hypothetical \$1,000 investment in unhedged ETF units of the ETF.

As at March 31, 2024, a person who invested \$1,000 in the fund since inception now has \$1,246.89. This works out to an annual compounded rate of return of 10.44%.

**TRADING ETFs**

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

**Pricing**

ETFs have two sets of prices: market price and NAV.

**Market Price**

ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF’s investments can affect the market price.

You can get price quotes any time during the trading day. Quotes have two parts: bid and ask.

The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is call the “bid-ask spread”.

In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

**Net Asset Value (NAV)**

Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF’s investment at that point in time.

NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

**Orders**

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

**Timing**

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

**WHO IS THIS ETF FOR?**

Investors:

- seeking capital appreciation through exposure to equity securities of European banks;
- willing to take the risk associated with equity investments; and
- seeking increased yield from a covered call strategy.

**A WORD ABOUT TAX**

In general, you’ll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

**HOW MUCH DOES IT COST?**

This section shows the fees and expenses you could pay to buy, own and sell Unhedged ETF Units of the ETF. Fees and expenses – including trailing commissions – can vary among ETFs. Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

| <p><b>1. BROKERAGE COMMISSIONS</b></p>  | <p>You may have to pay a commission every time you buy and sell unhedged ETF units of the ETF. Commissions may vary by brokerage firm. |---|--|--|--|---|--------------|--|--------------|----------------------------|---------------------|
| <p><b>2. ETF EXPENSES</b></p>   | <p>You don’t pay these expenses directly. They affect you because they reduce the ETF’s returns. As of December 31, 2023, the ETF’s expenses were 1.54% of its value. #### WHAT DOES THE ETF INVEST IN?

The investment objective of the Evolve Fund is to replicate, to the extent reasonably possible before fees and expenses, the performance of the Solactive European Bank Top 20 Equal Weight Index, or any successor thereto, while mitigating downside risk. The ETF invests primarily in the equity constituents of the Solactive European Bank Top 20 Equal Weight Index, or any successor thereto, while writing covered call options on up to 33% of the portfolio securities, at the discretion of the Manager. The level of covered call option writing may vary based on market volatility and other factors.

The charts below are intended to give you a snapshot of the ETF's investments on March 31, 2024. The ETF's investments will change.

#### HOW RISKY IS IT?

The value of the ETF can go down as well as up. You could lose money. One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETFs with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

**RISK RATING**

Evolve has rated the volatility of this ETF as **high**. This rating is based on how much the ETF’s returns have changed from year to year. It doesn’t tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

|            |                      |               |                       |             |
|------------|----------------------|---------------|-----------------------|-------------|
| <b>Low</b> | <b>Low to Medium</b> | <b>Medium</b> | <b>Medium to High</b> | <b>High</b> |
|------------|----------------------|---------------|-----------------------|-------------|

For more information about the risk rating and specific risks that can affect the ETF’s returns, see the “Risk Factors” section of the ETF’s prospectus.

**NO GUARANTEES**

ETFs do not have any guarantees. You may not get back the amount of money you invest.

**HOW HAS THE ETF PERFORMED?**

This section tells you how USD unhedged ETF Units of the ETF have performed over the past 1 year. Returns<sup>1</sup> after expenses have been deducted. These expenses reduce the ETF's returns. This means that the ETF's returns may not match the returns of the Solactive European Bank Top 20 Equal Weight Index Canadian Dollar Hedged.

<sup>1</sup> Returns are calculated using the ETF’s net asset value (NAV)

**Year-by-year returns**

This chart shows how USD unhedged ETF units of the ETF performed in the past 1 year. The ETF dropped in value in 0 of the 1 year.

The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

**Best and worst 3-month returns**

This table shows the best and worst returns for the USD unhedged ETF units of the ETF in a 3-month period over the past 1 year. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

|                     | Return  | 3 Months Ending  | If you invested \$1,000 at the beginning of the period |
|---------------------|---------|------------------|--|
| <b>Best return</b>  | 30.60%  | January 31, 2023 | Your investment would rise to \$1,306.01               |
| <b>Worst return</b> | -10.84% | May 31, 2023     | Your investment would drop to \$891.62                 |

**Average return**

This section shows the value and annual compounded rate of return of a hypothetical \$1,000 investment in USD unhedged ETF units of the ETF.

As at March 31, 2024, a person who invested \$1,000 in the ETF since inception now has \$1,163.05. This works out to an annual compounded rate of return of 7.03%.

## TRADING ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

### Pricing

ETFs have two sets of prices: market price and NAV.

#### Market Price

ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can affect the market price.

You can get price quotes any time during the trading day. Quotes have two parts: bid and ask.

The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "bid-ask spread".

In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

### Net Asset Value (NAV)

Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investment at that point in time.

NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

### Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

### Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

**WHAT IF I CHANGE MY MIND?**

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase. In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the prospectus, ETF Facts or financial statement contains a misrepresentation. You must act within the time set by the securities law in your province or territory. For more information, see the securities law of your province or territory or ask a lawyer.
