## INDEX METHODOLOGY

All securities in the index universe are secured as index componets. The following companies constituting the index static basket will be eligible for inclusion:

- i. Alphabet Inc.
- ii. Amazon Inc.
- iii. Apple Inc.
- iv. Facebook Inc.
- v. Netflix Inc.
- vi. Microsoft Corp.

+

Only one share class of each company is eligible for inclusion in the index universe. To avoid frequent changes between two share-classes of a company, index administrator applies a liquidity buffer rule:

a. If the company is currently included in the Index: The share class currently included in the Index will be eligible if its minimum Average Daily Value Traded over the preceding 1-month and 6-month prior to and including the Selection Day is at least 75% of the minimum Average Daily Value Traded over the preceding 1-month and 6-month prior to and including the Selection Day of any other share class of the company.

b. If the company is currently not included in the Index: The share class with the highest minimum Average Daily Value Traded over the preceding 1-month and 6-month prior to and including the Selection Day is included in the Index Universe.

+

On each selection day other index componet is assigned an equal weight.

## DISCLAIMER

Commissions, management fees and expenses all may be associated with exchange traded funds (ETFs). Please read the prospectus before investing. The indicated rates of return are the historical annual compound total returns net of fees (except for figures of one year or less, which are simple total returns) including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. ETFs are not guaranteed, their values change frequently and past performance may not be repeated.

The rates of return shown in the table are used only to illustrate the effects of the compound growth rate and is not intended to reflect future values of the ETF or returns on investment in the ETF.
